

Aviation Fuel Solutions Inc

Expertise you can trust

Mission Statement and Environmental Policy

Mission:

Aviation Fuel Solutions Inc is committed to provide highest standard of consulting services to aviation industry through its existing expertise in aviation fuel and airport/airlines operations, best practices and constantly finding innovative solutions.

Environmental Policy:

Aviation is a critical part of global economy. Although aviation industry has relatively low impact on environment but we believe any effort in improving the environment such as cleaner air or clean water is important. We also believe the viability of the aviation industry while minimising its impact on environment.

Our policy in this regard is multi prong as highlighted under.

We believe that we can help clean the environment;

- By awareness and provide training to clients on proper handling of aviation fuel, minimising hazards and following health and safety standards.
- By providing consulting services in minimising aviation fuel consumption by airlines while keeping their performance parameters unchanged through prudent, innovative and economically viable ideas and solutions. Less fuel burn, less environmental impact.
- By promoting paperless environment in airlines business through software solutions and hence saving trees.
- By providing consulting services to airports and ground service providers in measuring fuel quality at every level of the supply chain. Better fuel quality means less environmental impact.
- By providing consulting services to airlines in pooling airlines resources and reducing redundancy in their operations hence help improve environment.
